Online Continuous Learning

A CSC COIN Project

An Introduction of Developers

Krishan Gupta

JIIT Noida B.Tech, III Year

Atul Agarwal

JIIT Noida B.Tech, III Year

Rohit Pande

JIIT Noida B.Tech, III Year

Motivation

The following motivated us to take up the project and continue with undeterred interest.

- Our College, Jaypee Institute of Information Technology
- Mr. Shyam Motiyani – Project Manager at CSC Noida.
- Our love for real life projects.

The Purpose of Online Continuous Learning

Product Features:

- User can sign up using social networking sites or manually.
- User can select his/her areas of interest from the provided domain and sub-domain.
- Users can post their work and view other's posts as well.
- User can comment, up vote on the post.
- The posts will be appeared on the user's wall on the basis of ratings given by the judge of that domain.
- There will be a searching option for user to search their doubts.
- User can tag any other questions, point and website link related to the post.
- Related to selected domain, there will be a notification of the posts.

The Challenges

A look at the software that are able to do what we wanted to do. Making it similar to them for ease of use.

Dealing with huge amounts of data.

Making a web application always comes up with browser and device compatibility challenges.

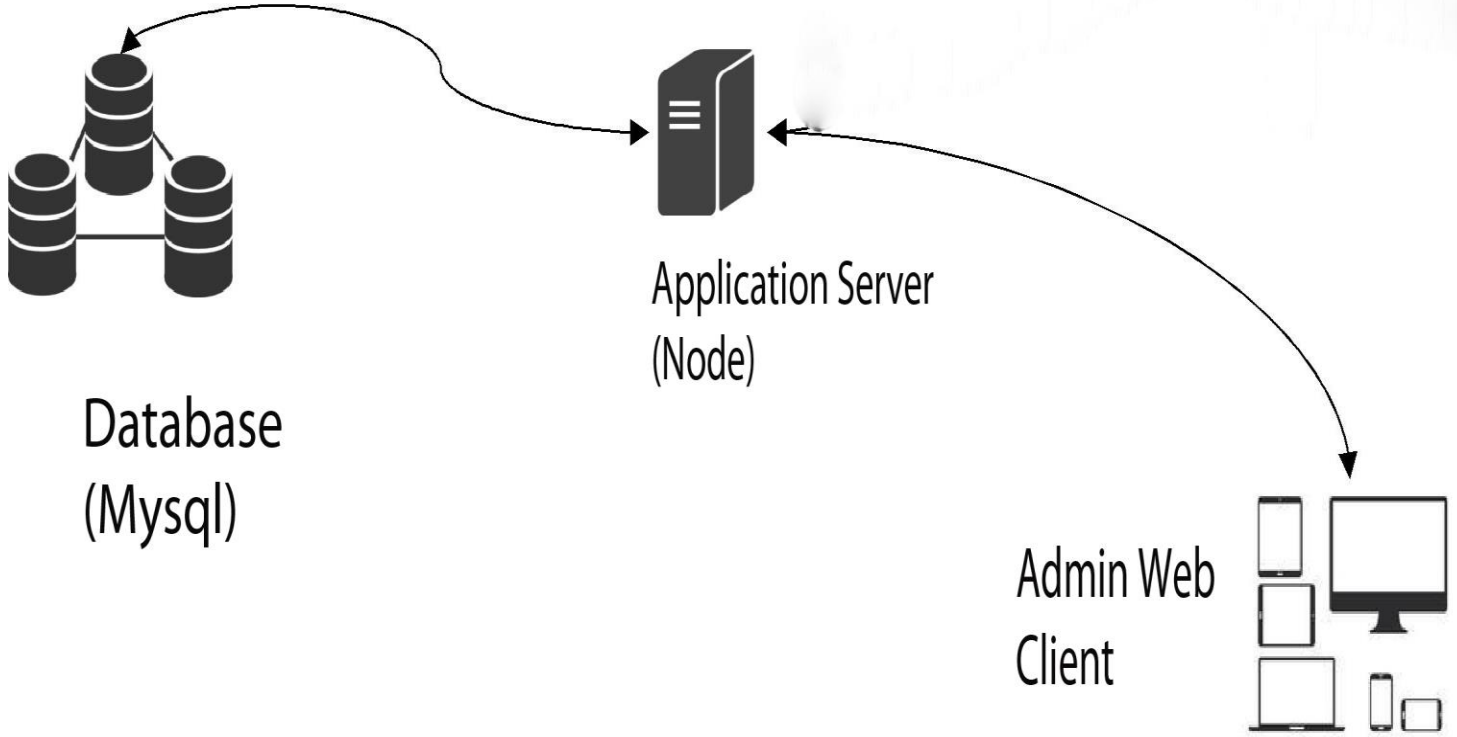
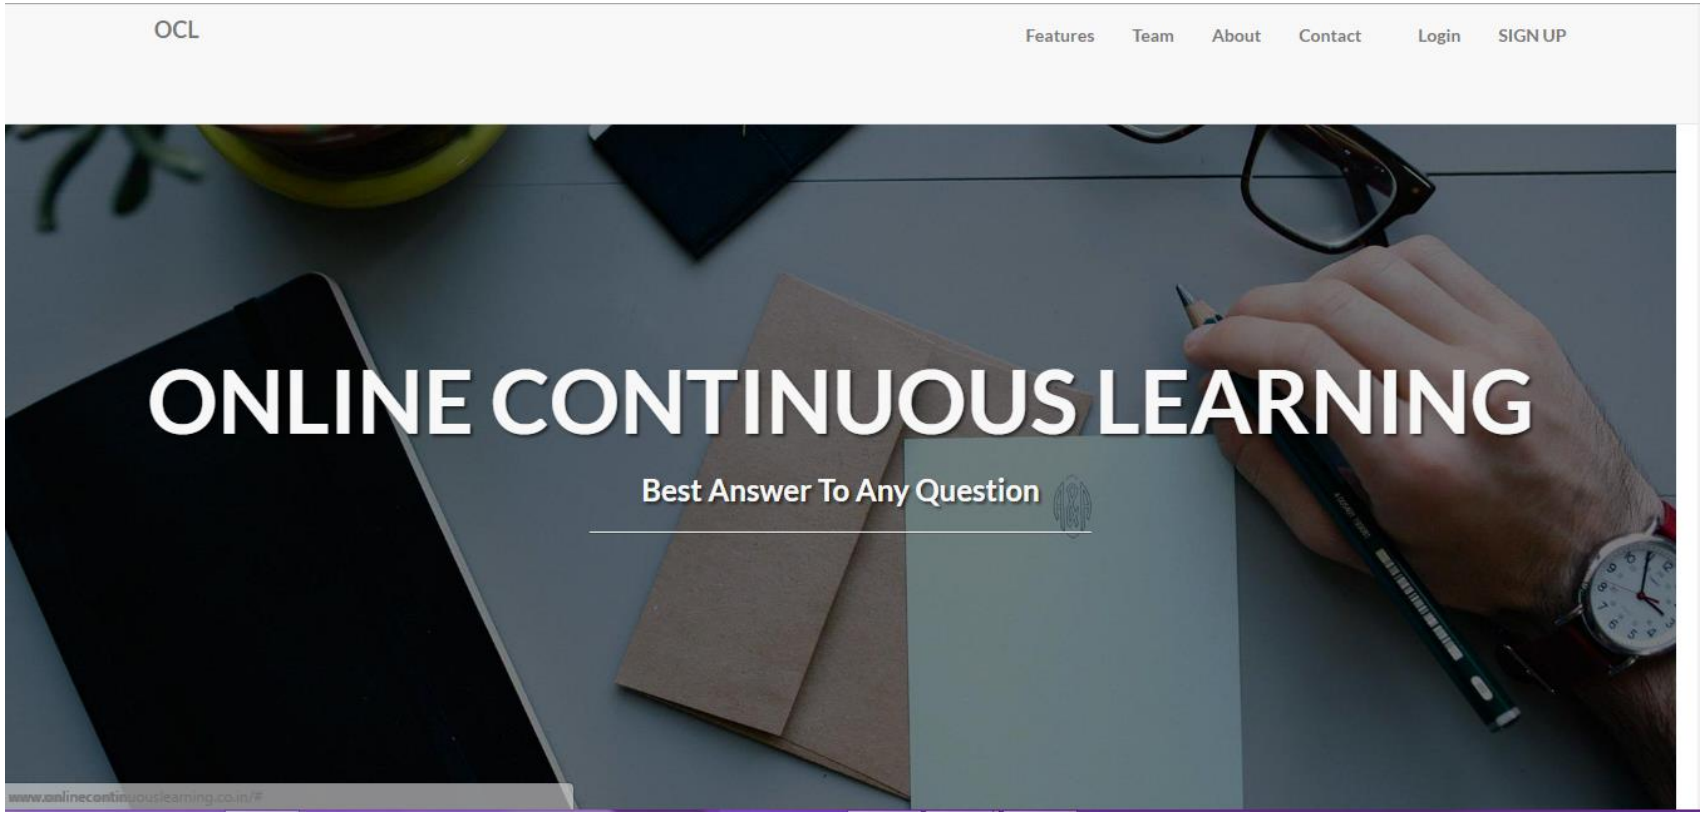
Application Architecture



The home page of OCL application looks like this



About the site

9013537909

CSC A global leader in providing technology enabled business solutions and services

About Us

OCL's mission is to share and grow the world's knowledge. A vast amount of the knowledge that would be valuable to many people is currently only available to a few — either locked in people's heads, or only accessible to select groups. We want to connect the people who have knowledge to the people who need it, to bring together people with different perspectives so they can understand each other better, and to empower everyone to share their knowledge for the benefit of the rest of the world.

User can contact to us, just send a small message along with his name and email id.

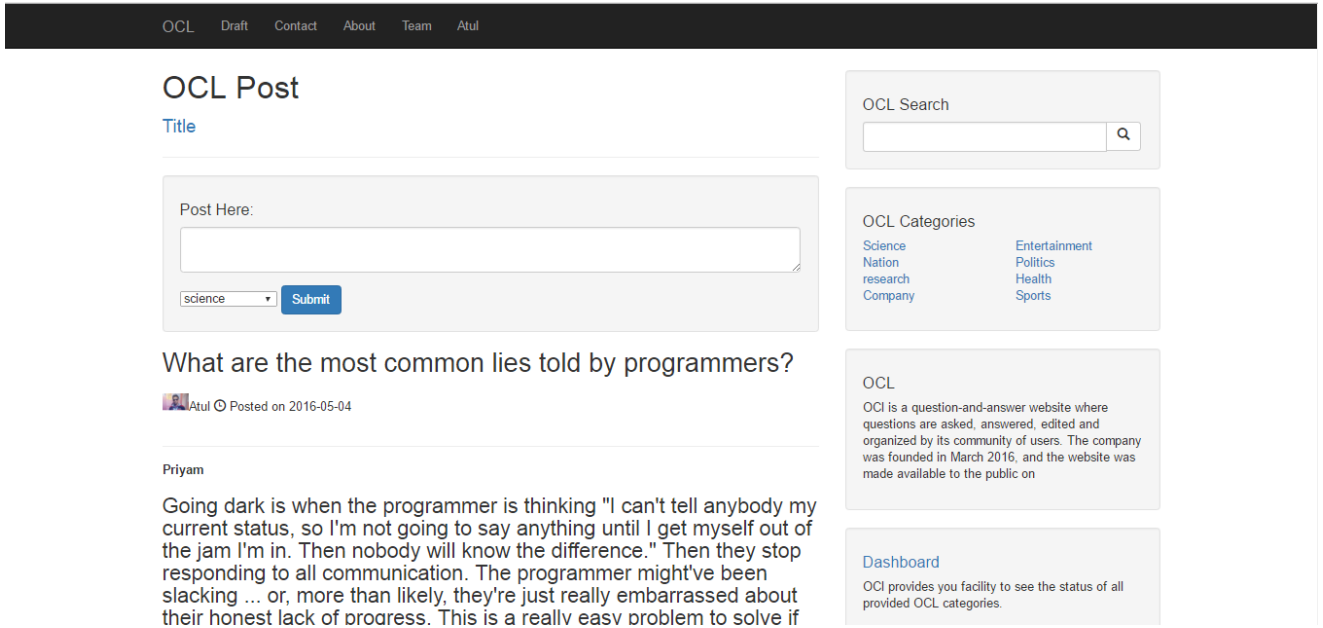
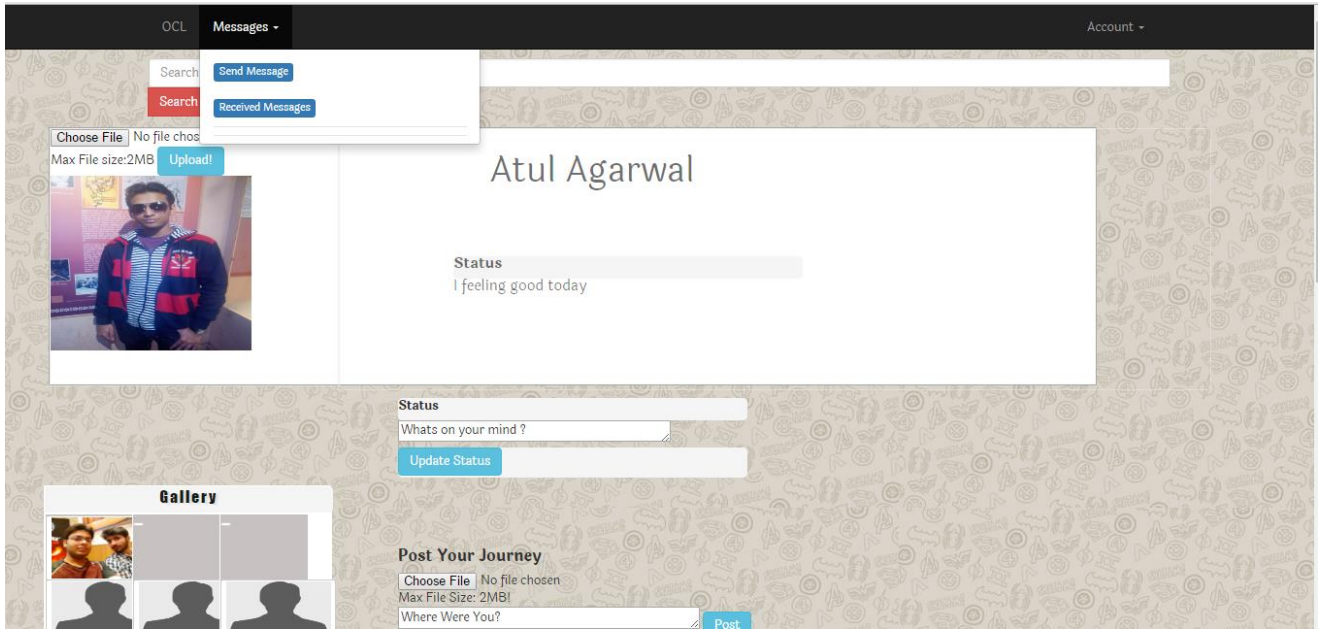
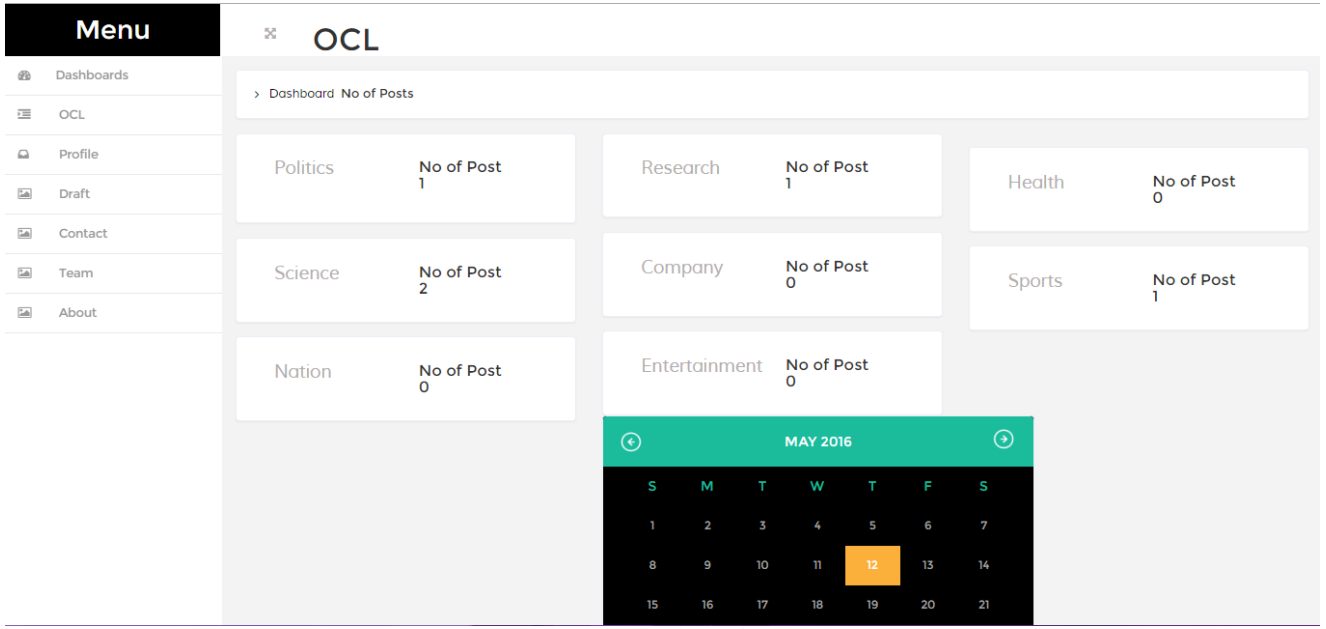
Our main page where user can see different post of different domain and can post their question also



User profile page with his pic, status and message panel.



User Dashboard, which depicts the no. of questions of every domain.



Benefits

CSC – The project could be used for internal sharing and monitoring of data within various departments of the company.

Students – Experience in the corporate world. Also knowledge enhancement and skill development.

Mentors – Be the guiding force behind this wonderful project and interaction with the student community.

Institute – The COIN initiative itself will strengthen the ties between CSC and our institute so that more of students would be selected for such projects in the future.

Thank You
